SERVICES AND  
SUSTAINABLE  
IMPROVEMENT  
STRATEGIES ACROSS  
MINING, OIL AND  
GAS, GOVERNMENT,  
MANUFACTURING,  
UTILITIES AND THE  
PRIVATE SECTOR

The Greencap team of scientists, ecologists, hydrogeologists, engineers and project managers live and breathe the environment – all over Australia and New Zealand. Our skilled and experienced consultants assist our clients to make informed decisions about environmental risks.

Greencap's breadth of expertise reaches wide, encompassing all areas of environmental management through approvals, construction and closure stages.

## Environmental Approvals

Increasingly, environmental awareness and a stronger drive to be involved in environmentally sustainable practices, together with stricter legislative requirements is driving many organisations to complete Environmental Impact Statements/Assessments.

Within Greencap we recognise each State or Territory has their own legislative requirements and documentation that needs to be prepared to support mining, licensing and development approval. Our skilled consultants understand the principles of completing a successful Environmental Impact Study (EIS), including stakeholder communication, issues management, scope appropriate investigations and delivering a high quality report.

Greencap has extensive knowledge and experience of organising and communicating project requirements.

## We have a wide variety of in-house skill sets across multiple areas including:

- Native title assessment
- Cultural heritage surveys
- Flora and fauna (both marine and terrestrial)
- Socio-economic appraisal
- Soil and erosion control
- Land capability assessments

At Greencap, we have extensive knowledge and experience of organising and communicating project requirements.

**Continued...**

- Dust and noise assessment
- Hazardous goods storage and impact
- Water resource plans
- Wastewater management
- Ground water management
- Surface water management
- Acid sulfate soil assessment
- Mine dewatering
- Mine management plans
- Stakeholder/public engagement
- Project management
- Feasibility assessment
- Baseline investigations
- Biting and insect management plan

## Compliance

It can be challenging for business to keep up to date with ongoing changes to environmental legislation. An organisation must clearly understand legislative environmental requirements in order to prioritise the most appropriate and cost effective response. With specialists specifically recruited for their experience and expertise in working with statutory authorities, Greencap offers our clients tailored services in line with statutory expectations.

**Compliance services include:**

- Environmental management systems
- Environmental legislative compliance

## Environmental Management Plans

At Greencap, we understand that once construction commences, environmental impacts need to be monitored, measured and reported back to management to ensure compliance with legislative requirements.

**Our consultants can prepare a variety of plans including:**

- Construction environmental management plans
- Operational environmental management plans
- Soil and erosion control plans
- Site management plans

We also offer training for project environmental officers in environmental awareness and assist in the implementation of monitoring programs.

## Environmental Monitoring Programs

At Greencap, we understand that as projects develop through the Approvals, Construction and ultimately Closure stages, the requirements for environmental management change. Our depth of experience and ability to provide tailored programs can assist our clients' organisations to move through the life cycle of projects.
