GREENCAP  
MAINTAINS AN  
EXTENSIVE RANGE  
OF STATE OF THE  
ART MONITORING  
AND SAMPLING  
EQUIPMENT TO  
ACCURATELY  
ASSESS EXPOSURE  
RISKS

At Greencap, we have considerable experience in assessing and monitoring physical and chemical hazards in the workplace. Providing a complete suite of occupational hygiene services, we have a team of highly experienced consultants who have worked with a broad range of organisations.

By maintaining an extensive range of state of the art monitoring and sampling equipment to accurately assess exposure risks; Greencap can provide practical solutions for all our clients' occupational hygiene needs.

### Occupational Hygiene Services

Occupational hygiene is the anticipation, recognition, evaluation, control and prevention of hazards from work that may result in injury, illness, or affect the wellbeing of workers.

At Greencap we utilise our knowledge and skill in science and engineering to prevent ill health caused by physical and chemical hazards in the environment in which people work. It helps employers and employees to understand the risks and improve working conditions and working practices.

Our multidisciplinary approach is built on having consultants with a broad and solid foundation of knowledge across all these disciplines with tertiary qualifications and accreditations recognised by the Australia Institute of Occupational Hygiene (AIOH) council.

The Greencap team includes Certified Occupational Hygienists (COH) and 'Full' AIOH members. Earning the designation of COH is recognition of the highest level of professional expertise by the AIOH and international agencies and ensures our clients are getting the services of a recognised and competent professional.

At Greencap we utilise our knowledge and skill in science and engineering to prevent ill health caused by physical and chemical hazards in the environment in which people work.

#### Greencap services include:

##### Physical Hazards

- Occupational noise surveys
- Environmental noise assessment
- Occupational noise management plans and control programs
