At Greencap, we know that day-to-day technological solutions are needed to help businesses run as efficiently as possible. Greencap's web-based risk management solutions will provide time efficient and hassle-free risk management of all our clients' risk and compliance obligations.

ContinuONE Risk Management System

The ContinuONE Risk Management System is web-based software that provides efficient, real time management of an organisation's Property, Work Health and Safety (WHS) & Environmental risks plus compliance obligations.

ContinuONE can manage risk across multiple portfolios & sites in ONE place and can:

- Record, analyse and report on compliance and risk data
- Integrate with other databases
- Track progress of corrective actions and recommendations
- Email escalation of overdue or critical items
- Offer a single sign-on/integration capability
- Capture audit data and upload compliance documents with modules covering asbestos and other hazardous materials, audits, document compliance and cooling towers

ContinuONE delivers the following modules to help efficient management and tracking of compliance and risk management requirements:

- Assessments & Hazardous Materials module
- Audits module
- Compliance Records module
- Water Systems module

Service and Support:

- Service is available online 24/7
- Email and phone support

Cm3 Contractor WHS Prequalification System

Knowing that contractors are insured and qualified in relation to work health and safety before they start work brings peace of mind, and assists our clients to meet the required legislative duty of care.

Greencap's Cm3 contractor prequalification system uses comprehensive online software that will help our clients determine the health and safety capabilities of contractors and service providers across Australia and New Zealand. With Cm3 as part of their business's armoury, our clients can select the best contractors, promote their health and safety capabilities and facilitate engagement.

For contractors: The online Cm3 system provides a cost effective solution for contractors to demonstrate and promote their health and safety capabilities to current and potential organisations.

For organisations: Cm3 gives organisations the assurance that the contractors they engage have the appropriate insurances and WHS management processes in place to safely conduct work, having been reviewed by qualified safety specialists.

Greencap's **Onsite Contractor Verification Service (OCV)** extends the benefits of Cm3, providing a one-system approach to tracking end-to-end compliance (see WHS fact sheet).

Go Induct

GO Induct is Greencap's web-based online induction system, providing a cost effective solution for delivering this essential training to employees and contractors in Australia or New Zealand - anywhere, anytime.

Go Induct enables organisations to:

- Fully integrate with Greencap's Cm3 Contractor WHS Prequalification system
- Invite contractors to complete induction training via email
- Track currency of employees/contractors trade licences and certifications
- Customise induction content, have multiple and site specific inductions
- Include online assessments to test knowledge
- Review currency of completed inductions online and via mobile devices
- Phone and email customer support from the Go Induct team

Call 1300 733 263 for more information.

TrimONLINE

Greencap's powerful web-based management tool TrimONLINE provides a solution to emergency planning and management. TrimONLINE is designed to meet the needs of organisations with multiple sites that need to coordinate, track and monitor emergency planning actions and programs.

TrimONLINE allows recording, analysis and reporting of compliance and emergency management data across a group of sites, regions, states or even nationally.

Key features of the software include:

- Online management of portfolio emergency training records and schedules
- Ready access to emergency management information
- Ability to update warden details online
- Secure (encrypted) password access to site or portfolio specific records
- Archiving of issues solved as data is all electronically filed

Visit www.trimevac.com.au for more information.

TrimEVAC Online Fire and Evacuation Training

TrimEVAC's DIY - Online Fire and Evacuation Training System makes fire and evacuation training quick and easy for an organisation to organise and manage. Simply create an account and purchase the required training tickets. A password will then allow your group to access and complete training online and at their convenience. The system automatically tracks and provides reports about who has completed training. Designed to complement the Greencap compliance based training programs, this online system helps meet our clients' induction and general staff training obligations.

Visit www.trimevac.com.au for more information.
