TRAINING PROGRAMS ARE AN IMPORTANT STEP IN COMMUNICATING AND RAISING AWARENESS OF RISK MANAGEMENT ISSUES AND COMPANY POLICIES

Greencap is a leading provider of innovative Workplace Health and Safety (WHS/ OHS), environmental, property, fire safety and risk management services to business, industry and government. Our approach to training and capacity building programs is based on over 30 years consulting experience working closely with our clients making practical and sustainable improvements.

It is essential that all elements of a risk management system be communicated to senior management, employees and third parties. Training and capacity building programs are an important step in communicating and raising awareness of risk management issues and company policies.

The Greencap Training Advantage

Greencap develop training and capacity building programs through an analysis of clients' needs and applying the skills and knowledge of the Greencap expert and professional staff to provide clients' organisations significant benefits including:

- Practical and informative programs
- Access to practitioners currently working with clients
- Interactive and activity based learning
- Industry relevance
- An understanding of our clients' legislative obligations
- Incorporation of adult learning principles
- An enjoyable training experience

Delivered where you need it most

Training is delivered in-house or on-site, with facilities in major metropolitan cities in Australia and New Zealand.

Environmental Training

Since 2000, Muddy Boots Environmental Training courses have been delivered to a variety of clients, drawing upon extensive experience in construction, mining, power, government, agriculture, waste, manufacturing, and service industries. The training is interactive, practical, and delivered by experienced environmental professionals.

Training Modules include:

- General Environmental Training
- Soils
- Hazardous Substances And Spills
- Cultural Heritage Awareness
- Biodiversity Offsets Scheme Training
- Environmental Risk Assessment
- Monitoring and Sampling
- Land Management

Biodiversity Offsets Scheme Training

Muddy Boots Environmental Training has been appointed by the NSW Office of Environment and Heritage (OEH) as the exclusive training provider for the Biodiversity Offsets Scheme. Introduced in 2016, the Biodiversity Conservation Act 2016 aims to deliver ecologically sustainable development in New South Wales and address the loss of biodiversity via a biodiversity offsets scheme and private land conservation agreements.

Biodiversity Offsets Scheme Training Courses:

- Training for Accredited Assessors
- Training for Local Government Approvers (Standard & Extended)
- Introduction to the Biodiversity Offset Scheme Assessment Method
- Practical Applications of the Biodiversity Assessment Method

Emergency Management & Safety Training

TrimEVAC has been helping organisations effectively Plan for, Respond to, and Recover from emergencies in facilities since 1987.

AS3745-2010: Planning for Emergencies in Facilities, which forms part of the WHS/OHS Regulations, provides guidance on what is required to meet legislative requirements in relation to emergency management preparedness within a workplace.

TrimEVAC provides services relating to this standard including:

- Warden training
- Chief Warden training
- Evacuation Drills
- Emergency Planning Committee (EPC) meetings
- Emergency Response Procedures manuals

TrimEVAC also provides Fire Safety Advisor audits and provides industry leading FSA services. These services not only cover the AS3745-2010 but also cover the Queensland Building Fire Safety Regulation 2008 (QBFSR2008). TrimEVAC have a number of QBCC Fire Protection Supervisors and Occupational licence holders.
