EASY TO USE
WEB-BASED
SYSTEMS ENABLE
OUR CLIENTS TO
MANAGE CRITICAL
BUSINESS RISKS

Greencap understands that day-to-day technological solutions are needed to help businesses to run as efficiently as possible. Greencap's web-based risk management solutions provide time-efficient and hassle-free risk management of all your risk and compliance obligations in Australia and New Zealand.

ContinuONE - Risk Management System

The ContinuONE (formerly known as Rm3) Risk Management System is a web-based software platform that enables your business to manage your health and safety obligations and risks efficiently.

With ContinuONE working for you (across multiple sites if needed) you can:

- Record, analyse and report on compliance and risk data
- Track progress of corrective actions and recommendations
- Email escalation of overdue or critical items

ContinuONE delivers four modules to help you manage compliance and risk issues:

- Assessments module
- HAZMAT Management module
- Cooling Tower Management module
- Document Compliance module

Service and Support:

- Service is available online 24/7
- Email and phone support

Cm3 - Contractor WHS Prequalification System

Cm3 is an online contractor WHS prequalification system which assists companies in meeting their legislative duty of care around the selection and use of contractors. It allows them to demonstrate that their contractors are carefully selected based on WHS capabilities and practices which comply with current WHS legislation.

The Greencap Cm3 contractor WHS prequalification system is tailor-made to suit each client's contractor management needs. It offers:

- Ongoing verification of contractor's insurance certificates
- An online WHS assessment completed by contractors and reviewed by our highly qualified safety specialists
- Dashboard reporting and regular contractor exception reporting via email
- Specialised features and functions that assist with a variety of contractor management requirements

Clients can choose from a number of optional contractor management solutions including:

- CARs (Corrective Action Request) system
- Contractor communications
- Creation and tracking of contractor surveys
- A link that allows contractors to lodge regular invoice declarations via their Cm3 account
- Requesting contractors submit documents through Cm3 for their review
- Upload and review of contractor licences

Cm3 Clients have access to a large pool of prequalified contractors across the country with the ability to search by location, business type and prequalification status.

Call 1300 733 263 for more information.

Greencap's **Onsite Contractor Verification Service (OCV)** extends the benefits of Cm3, providing a one-system approach to tracking end-to-end compliance (see WHS fact sheet).

Go Induct - Online Induction System

GoInduct is a web based online induction system, providing a cost effective solution for the delivery of essential training to employees and contractors in Australia and/or New Zealand.

Go Induct enables organisations to:

- Invite contractors to complete induction training via email and track their progress
- Integrate induction completion data with your registered Cm3 sites
- Customise induction content and have multiple site specific inductions hosted online
- Include online assessments to test knowledge
- Review currency of completed inductions both online and via mobile devices
- Phone and email customer support from the GoInduct Team.

Call 1300 733 263 for more information.

TrimONLINE

TrimOnline is a web based management tool you can coordinate, track and monitor emergency planning actions and programs.

TrimOnline allows recording, analysis and reporting of compliance and emergency management data across a group of sites, regions, states or nationally.

Key features of the software include:

- Online management of portfolio emergency training records and schedules
- Ready access to emergency management information (emergency plans and diagrams)
- Ability to update warden details online
- Secure (encrypted) password access at different security levels to site or portfolio specific records

Visit www.trimevac.com.au for more information.

TrimEVAC Online Fire and Evacuation Training

TrimEVAC's DIY - Online Fire and Evacuation Training System makes fire and evacuation training quick and easy for an organisation to organise and manage. Simply create an account and purchase the required training tickets. A password will then allow your group to access and complete training online and at their convenience.

The system automatically tracks and provides reports about who has completed training. Designed to complement the Greencap compliance based training programs, this online system helps meet our clients' induction and general staff training obligations.

Visit www.trimevac.com.au for more information.
