Hospitals & Healthcare Facilities

Contractor Risk Management for Hospitals & Healthcare Facilities

Hospital & Healthcare facilities demand absolute confidence in Contractor Compliance and Safety Practices

Hospitals and Healthcare facilities are subject to inherent risks, particularly involving infection control and biological risks. It is therefore paramount for contractors working within these environments to have appropriate risk controls in place and hold appropriate competencies, licences, and insurances.

Your facility may utilise contracted medical personnel, patient care assistants, cleaners, food staff, security guards, facilities staff, administrative workers, and more. This diversity prescribes a strong system to be able to engage and manage contractors that are appropriately qualified, insured, and licensed.

Failure to source and verify contractors that can safely and compliantly undertake the work you require from them could have serious legal implications and potentially disastrous consequences for patient outcomes, worker and visitor health and safety, and the community at large.

Contractor Risk Areas in Healthcare Facilities

*Sterilisation
Infection Control
Laundry
Medical Gases
Support Services*

*Waste Management
Security & Visitor Safety
Medication Safety & Storage
Food Services
Construction & Maintenance*

Managing your Contractor Compliance & Prequalification using Cm3

Cm3 gives you the ability to manage all aspects of your contractor compliance - online and visible across your whole business.

The Cm3 Assessment Team has extensive knowledge of risks and legislative obligations for employers, employees, and contractors in the context of hospitals and healthcare facilities. Using Cm3, you are also able to request necessary licences, insurances, and other documentation from your contractors to be verified.

The system provides you with the flexibility to control your required minimum insurance cover for individual suppliers and collect and verify any type of contractor licences or company documentation. If required, you can have your contractors complete an online declaration of adherence to your policies and procedures.

The Cm3 prequalification assessment looks at a risk profile based on the contractor's type of work and evaluates their preparedness for work and their capability to undertake this safely.

Cm3's dedicated, Australian-based support team ensures that your contractors are assisted through their onboarding process and are given the best chance to reach prequalification and improve their own safety management systems.

Dashboard Reporting

Cm3 provides an easy to use web-based interface, giving you real-time access to the status of your contractors' prequalification.

Expert Assessor Team

With a full-time expert compliance team, the Cm3 prequalification process stays up to date with changing regulations and legal requirements.

Built by WHS Experts

By leveraging Cm3's centralised system of already prequalified contractors and a standardised process, your organisation can dramatically decrease the time required to prequalify your contractors.

Over 170 businesses trust Cm3 with their contractor risk compliance
