

A GUIDE FOR IMPORTATION OF MATERIALS FOR ASBESTOS TESTING

Avoid risk of massive fines - Always import samples of potentially asbestos-containing materials through a current Import Permit Holder / NATA-Accredited Testing Laboratory.

Greencap has the **largest network of NATA-accredited Asbestos Testing Laboratories in Australia**, and holds **permission to import samples of both possible amphibole and serpentine asbestos** for the purpose of research or analysis in accordance with 'Subsection 4C(2) of the Customs (Prohibited Imports) Regulations 1956' (Permission No. 10-2021)
