GOVERNMENT,
MANUFACTURING,
UTILITIES AND THE
PRIVATE SECTOR

The in-house team of scientists, hydrogeologists, regulatory specialists and project managers at Greencap have demonstrated technical excellence in environmental management services and work in partnership with clients to inform on decisions regarding environmental risks.

Greencap's expertise extends across a range of industry sectors including government, construction, resources and infrastructure, and encompasses all areas of environmental management through the approvals, construction and operational stages.

Development & Environmental Approvals

Increasingly, environmental awareness and a stronger drive to be involved in environmentally sustainable practices, together with stricter legislative requirements is driving many organisations to complete Environmental Impact Statements/Assessments.

Each State or Territory across Australia and New Zealand has their own nomenclature and documentation that needs to be prepared to support mining and development approval. Greencap's skilled consultants understand the principles of completing a successful Environmental Impact Statement (EIS) - stakeholder communication, issues management, scope appropriate investigations and deliver a high-quality report.

At Greencap, the knowledge and experience of organising and communicating project requirements is supported by a wide variety of in-house skill sets across multiple areas including:

- Native Title Assessment
- Cultural Heritage Surveys
- Flora and Fauna (Marine and Terrestrial)
- Socio-Economic Appraisal
- Soil and Erosion Control
- Biting Insect Management Plans
- Land Capability Assessments
- Dust and Noise Assessment

At Greencap, we have extensive knowledge and experience of organising and communicating project requirements.

- Feasibility Assessment
- Baseline Investigations
- Tenement management
- Exploration and mining approvals

Environmental Compliance Auditing & Monitoring

It is challenging for a business to keep up to date with ongoing changes to environmental legislation. An organisation must clearly understand legislative environmental requirements in order to prioritise the most appropriate and cost-effective response. With specialists specifically recruited for their experience and expertise in working with statutory authorities, Greencap offer tailored services in line with statutory expectations.

Compliance services include:

- Environmental management systems
- Environmental legislative compliance

Environmental Management Plans

Once construction commences, environmental impacts need to be monitored, measured and reported back to management to ensure compliance with legislative requirements.

Greencap's consultants can prepare a variety of plans including:

- Construction Environmental Management Plans
- Operational Environmental Management Plans
- Soil and Erosion Control Plans
- Site Management Plans

Furthermore, Greencap offer training for project environmental officers in environmental awareness and assist in the implementation of monitoring programs.

Environmental Monitoring

As projects develop through the Approvals to Construction and ultimately the Closure stages, the requirements for environmental management change. Greencap's depth of experience and ability to provide tailored programs can assist your organisation as you move through the life cycle of a project.
